PROFESSIONAL SUMMARY

Full Stack Developer with a strong foundation in **React, Next.js, and TypeScript**. Results-oriented, with an analytical and creative mindset for building robust and scalable solutions. Throughout my career, I have demonstrated my ability to take **full ownership of the software development lifecycle**, from conceptualization to final delivery. Passionate about **clean code**, **best practices**, and **collaboration in multidisciplinary teams** within agile environments. I am actively seeking opportunities to learn and apply my skills in cutting-edge technologies that create a tangible impact.

PROFESSIONAL EXPERIENCE

Full Stack Developer – Team Project (Bootcamp) *Soy Henry Bootcamp* | July 2025 – August 2025

- Collaborated in a team of 6 to build an incident management platform, contributing to the **full software development lifecycle**.

- Developed and implemented **responsive, accessible, and modular** UI components using **Next.js, React, and TypeScript**.

- Participated in **agile workflows** with two-week sprints, including sprint planning and code reviews.

- Integrated the front-end with **RESTful APIs** and **real-time data sources (Socket.IO)**.

- Applied **unit, integration, and acceptance tests** to ensure code quality.

Freelance Developer & Self-Directed Learning *January 2024 – July 2025*

- Developed and maintained a portfolio of personal and client projects, focusing on modern web development practices.

- Deepened my knowledge of **TypeScript, Next.js, Node.js, and software design principles**, applying a **modular code** approach.

- Gained experience with **Next.js** and **Node.js** to build dynamic full stack solutions.

Front-end Intern – BigTree Studio *August 2023 – December 2023*

- Maintained and improved production web interfaces, with a focus on **accessibility (HTML)** and performance.

- Collaborated in the team using **PHP** for backend maintenance and improving existing functionalities.

- Contributed to the team's development practices within an agile environment.

- Used **Git** for version control.

Junior Freelance Web Developer *February 2022 – July 2023*

- Developed responsive web components and sections using modern **CSS techniques like Flexbox and CSS Grid**.

- Created static websites with a strong focus on **clean code** and animations.

PROJECTS

Full-Stack Incident Resolution Platform *July 2025 – August 2025*

- **Description:** A platform for incident management. It features a component-driven architecture, integration with **real-time data**, and the use of **high-value testing**.

- **Technologies:** Next.js, React, TypeScript, Node.js, Tailwind CSS, PostgreSQL.

TECHNICAL SKILLS

- **Frontend:** JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, Bootstrap.

- **Backend:** Node.js, Express, PHP.

- **Testing:** Unit, integration, acceptance testing, Vitest, React Testing Library.

- **Databases:** PostgreSQL, MongoDB, Mongoose, TypeORM.

- **Architecture & Design:** Full Stack Development, modular code, software design principles, accessible HTML, monorepo.

- **Methodologies & Tools:** Agile, CI/CD, Git, GitHub, Postman, Jira, Trello, Figma, Vercel, Docker (eager to learn), Azure (eager to learn).

- **Concepts:** Load optimization, scalability, legacy code, AI.

EDUCATION

Fullstack Web Developer – Front-end Oriented Track *Soy Henry Bootcamp* | 2024 – 2025

- +700 hours of intensive training in JavaScript, TypeScript, React, Next.js, and Node.js.

Technical Degree in Programming *Teclab Institute, Argentina* | 2022 – 2024

- Focus on software development fundamentals, databases, and programming principles.

LANGUAGES

- **Spanish:** Native

- **English:** C1 (Advanced – EF SET CERTIFICATE)

- **Italian:** B1/B2 (Good spoken and written level)

- **French:** A1 (Basic knowledge)
